

# STRUCTURES OF STORY PROBLEMS

## SEPARATE

### STRUCTURES OF SEPARATE PROBLEMS

Separate story problems have an action that causes a decrease. These problems have the same three quantities as join problems: the result amount, the change amount, and the initial amount.

When drawing separate problems, teachers should use a consistent format. This format has the three steps described below, but only one final diagram. It is important to note that students may draw a variety of diagrams representing what they do with concrete materials, and these (provided they are logical) should be accepted.

### SAMPLE RESULT UNKNOWN

Kevin had 37 marbles before he went out to recess. During recess he lost 15 marbles. How many marbles does he have left?

#### STEP 1:

Start with the template for separate problems.

#### STEP 2:

Fill in what I know and use a question mark (?) to indicate the unknown quantity.

#### STEP 3:

Circle what is separated and fill in the unknown bubble.

Step 3, the final diagram, is all that is seen by the teacher.

# STRUCTURES OF STORY PROBLEMS

## SEPARATE

The same process is used with all three types of separate questions.

**SAMPLE  
CHANGE  
UNKNOWN**

Kevin had 37 marbles before he went out to recess. During recess he lost some marbles. He now has 22 marbles left. How many did he lose during recess?

**STEP 1:**  
Start with the template for separate problems.

**STEP 2:**  
Fill in what I know and use a question mark (?) to indicate the unknown quantity.

**STEP 3:**  
Circle what is separated.

# STRUCTURES OF STORY PROBLEMS

## SEPARATE

**SAMPLE  
INITIAL  
UNKNOWN**

Kevin had some marbles before he went out to recess. During recess he lost 15 marbles. He now has 22 marbles left. How many did he have before recess?

**STEP 1:**

Start with the template for separate problems.

**STEP 2:**

Fill in what I know and use a question mark (?) to indicate the unknown quantity.

**STEP 3:**

Fill in the unknown.

**NOTE:**

When completed, the pictures for all three types of separate problems will look the same except for the location of the question mark.

# ADDITION AND SUBTRACTION GRADE PRIMARY

## SEPARATE

**RESULT  
UNKNOWN**

A farmer has 6 apples. She gives away 4 of them. How many does she have left?

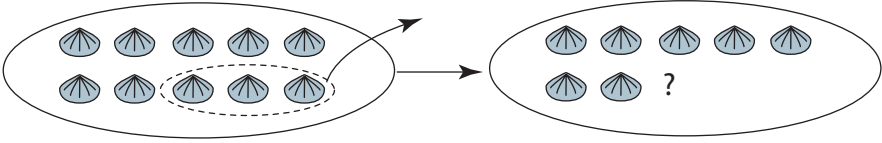

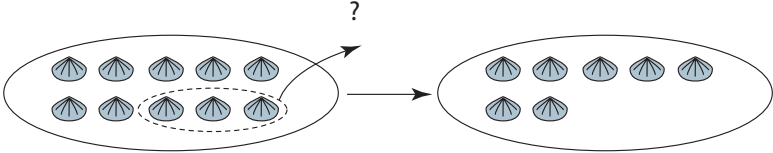

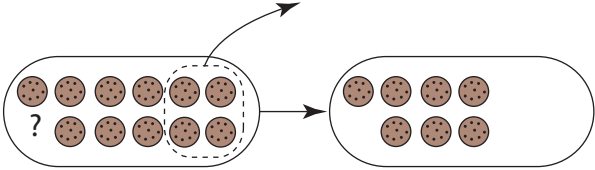

**CHANGE  
UNKNOWN**

**INITIAL  
UNKNOWN**

# ADDITION AND SUBTRACTION GRADE 1

## SEPARATE

<p><b>STRUCTURES OF ADDITION AND SUBTRACTION</b></p>	<p>The remaining structures are introduced as students begin to make the connection between addition and subtraction. Students continue using set models and ten frames should also be used extensively.</p>
<p><b>RESULT UNKNOWN</b></p>	<p>Gillian had 10 shells in her bucket. She gave her brother 3 shells. How many does she have left?</p>  <p style="text-align: right;"><b>Think Subtraction:</b>  <math>10 - 3 = 7</math></p>
<p><b>CHANGE UNKNOWN</b></p>	<p>Gillian had 10 shells in her bucket. She gave some to her brother. Now she has 7 shells left. How many did she give to her brother?</p>  <p style="text-align: right;"><b>Think Subtraction:</b>  <math>10 - 3 = 7</math>          Remove shells from 10 until you have 7 left, so you removed 3  <b>or</b>  <math>10 - 7 = 3</math>          Start with 10 and subtract the 7 she has left to find the 3 she gave away</p>
<p><b>INITIAL UNKNOWN</b></p>	<p>Annie had some cookies. She gave Alex 4 of them. Now she has 7 cookies left. How many cookies did Annie have to begin with?</p>  <p style="text-align: right;"><b>Think Addition:</b>  <math>7 + 4 = 11</math>          The 7 that remain, plus the 4 that were given away together total 11 cookies</p>

# ADDITION AND SUBTRACTION GRADE 2

## SEPARATE

<b>RESULT UNKNOWN</b>	<p>Kevin had 37 marbles before he went out to recess. During recess he lost 15 marbles. How many marbles does he have left?</p> <div style="display: flex; align-items: center; justify-content: center; gap: 20px;"> <div style="text-align: center;"> <p>■ = 1</p> </div> <div style="text-align: left;"> <p><b>Think Subtraction:</b>  <math>37 - 15 = 22</math>                      He started with 37 and lost 15, he has 22 left.</p> </div> </div>
<b>CHANGE UNKNOWN</b>	<p>Kevin had 37 marbles before he went out to recess. During recess he lost some marbles. He now has 22 marbles left. How many did he lose during recess?</p> <div style="display: flex; align-items: center; justify-content: center; gap: 20px;"> <div style="text-align: center;"> <p>■ = 1</p> </div> <div style="text-align: left;"> <p><b>Think Subtraction:</b>  <math>37 - 22 = 15</math>                      He started with 37 and subtracted the 22 he had left to get the 15 that he lost</p> </div> </div>
<b>INITIAL UNKNOWN</b>	<p>Kevin had some marbles before he went out to recess. During recess he lost 15 marbles. He now has 7 marbles left. How many did he have before recess?</p> <div style="display: flex; align-items: center; justify-content: center; gap: 20px;"> <div style="text-align: center;"> <p>■ = 1</p> </div> <div style="text-align: left;"> <p><b>Think Addition:</b>  <math>15 + 7 = 22</math>                      The 7 that he has plus the 15 he lost is what he started with</p> </div> </div>

# ADDITION AND SUBTRACTION GRADE 3

## SEPARATE

**RESULT UNKNOWN**

Carol saved \$231 from doing chores. She spent \$98 to buy some school clothes. How much money does she have left?

**CHANGE UNKNOWN**

Carol saved \$231 from doing chores. She spent some of it to buy some school clothes. She has \$133 left. How much did she spend?

**INITIAL UNKNOWN**

Gillian had some shells in her bucket. She gave her brother 23 of them. She has 39 left. How many did she begin with?

# ADDITION AND SUBTRACTION GRADE 4

## SEPARATE

**RESULT  
UNKNOWN**

Maya had  $\frac{3}{4}$  of a pizza. She gave her friend  $\frac{1}{4}$  of the pizza. How much does she have left?

**Think Subtraction:**

$$\frac{3}{4} - \frac{1}{4} = \frac{2}{4}$$

**CHANGE  
UNKNOWN**

Maya had  $\frac{3}{4}$  of a pizza. She gave her friend some of the pizza. She has  $\frac{2}{4}$  left. How much did she give her friend?

**Think Subtraction:**

$$\frac{3}{4} - \frac{2}{4} = \frac{1}{4}$$

or

$$\frac{3}{4} - \frac{1}{4} = \frac{2}{4}$$

**INITIAL  
UNKNOWN**

Maya had part of a pizza. She gave her friend  $\frac{1}{4}$  of the pizza. She has  $\frac{2}{4}$  left for herself. How much did she have to start with?

**Think Addition:**

$$\frac{2}{4} + \frac{1}{4} = \frac{3}{4}$$

# ADDITION AND SUBTRACTION GRADE 5

## SEPARATE

**RESULT  
UNKNOWN**

A pile of sugar has a mass of 2.36 kg. If you use 1.23 kg of the sugar, what is left?

**Think Subtraction:**  
 $2.36 - 1.23 = \textcircled{1.13}$

**CHANGE  
UNKNOWN**

A pile of sugar has a mass of 2.36 kg. If you use some and you have 1.13 kg of the sugar left, how much did you use?

**Think Subtraction:**  
 $2.36 - 1.13 = \textcircled{1.23}$

**INITIAL  
UNKNOWN**

You had a pile of sugar. If you use 1.23 kg of the sugar and you have 1.13 kg left over, what was the mass of the original pile?

**Think Addition:**  
 $1.13 + 1.23 = \textcircled{2.36}$

# ADDITION AND SUBTRACTION GRADE 6

## SEPARATE

**RESULT  
UNKNOWN**

Bob had  $\frac{5}{8}$  of a pizza. He gave his friend Mike  $\frac{2}{8}$  of the pizza. How much did he keep for himself?

**Think Subtraction:**

$$\frac{5}{8} - \frac{2}{8} = \left(\frac{3}{8}\right)$$

**CHANGE  
UNKNOWN**

Bob had  $\frac{5}{8}$  of a pizza. He gave his friend Mike some of the pizza. He kept  $\frac{3}{8}$  for himself. How much did he give Mike?

**Think Subtraction:**

$$\frac{5}{8} - \frac{3}{8} = \left(\frac{2}{8}\right)$$

**INITIAL  
UNKNOWN**

Bob had some pizza. He gave his friend Mike  $\frac{2}{8}$  of the pizza. He kept  $\frac{3}{8}$  for himself. How much did he have to start?

**Think Addition:**

$$\frac{3}{8} + \frac{2}{8} = \left(\frac{5}{8}\right)$$
